Stock Soars.

An enterprise of gigantic proportions is being undertaken in the West Dip of Bingham, and representatives of Boston capital have been looking over the ground within the past few weeks. The scheme contemplates the formation of what is to be known as the Bingham West Dip Tunnel company, and Milando Pratt, who is in touch with what is going on, said yesterday that plans will soon be perfected, and the new company incorporated.

Ground comprising several hundred acres, lying parallel with the Ensign acres, lying parallel with the Ensign group of mining claims, Mr. Pratt says, has already been secured, and just as soon as the company is thoroughly organizedit is the intention to commence the work of development by starting a tunnel, which it is proposed to run for a distance of four miles, commencing at the base of the mountain, on the wast side of the four miles. west side of the Oquirrh range, at an Caltitude of 6,300 feet, and running coutheasterly beneath the divide between Tooele and Salt Lake counties, whose summit is 8,400 feet above the sea, or 2,100 feet above the proposed

The purpose of the enterprise is not only to open up the mineral resources of the company's territory, but also to tap the mineral zones on the east side of the mountains. Another feature of the undertaking is to drain the mines of the camp, thus affording the means for reclaiming thousands of acres of desert lands on the west side of the Oquirrh range, which today are valueless for the want of moisture, but which could be made into one of the most fertile spots in the state if the plans of the proposed company are carried out.
The scheme involves an immense out-

lay of capital, but Mr. Pratt believes the plan will succeed, and the resulte that would come from such an undertaking are enormous.

ENSIGN ANNUAL ELECTION. Company's Properties Reported in a Elealthful Condition.

The annual meeting of the stockholders of the Ensign Gold Mining company took place on the 19th inst., and the new board elected for the ensuing year will consist of F. M. Bishop, Milando Pratt, John A. Silver, Lorus Pratt and William Crabbe, who subsequently met and organized by electing F. M. Bishop president, John A. Silver, vice president, and Milando Pratt secretary and

The secretary's report showed the company to be in a healthful and prosperous condition. The company's holdings consist of two groups of mining claims, Ole Buil, George Washington, Abe Lincoln and Gold Lear, situated in City Creek convented to the condition of the convented to City Creek canyon, easterly from En-sign peak, in the Hot Springs mining district, and the New Year, Mountain Lion, Mountainer, Easter, Cascade and "1990," besides a mili site and water claim, situated in Pole canyon, Tooele mining district, Wes' Dip of Oquirrh cance, near Eingham.

The machinery for the new smelter he says, is on the road, but just how soon it will arrive he cannot say, until he has further reports from Mr. Ryan could be a supposed.

high assays of gold and silver were made from some samples of ore taken from a shaft which was being sunk a year or so ago upon the City creek group. At a depth of about thirty feet two samples were found which assayed respectively, 237 ounces silver, 840.25 gold, and 310 ounces silver, \$1,098.20

Considerable work has been done upon the company's City creek group, consisting of tunneling and sinking sharts, which has resulted in the discovery of a quartzite ledge near the surface much mineralized, and would indicate from the similar iron-stained appearance to the above mentioned assayed samples that the "mother lode" is not very far away.

Considerable development work has

also been done upon the Ensign com-pany's western claims near Bingnam, they having had an ample force of minrs at work all winter. A shaft 120 eet deep and a tunnel 170 feet long has been made upon a well defined vein, varying from five to eight feet in width between walls. The tunnel will intercept the shaft at a distance of about 600 feet from its mouth, while the shaft will be about 300 feet deep, forming a good air chimney, and the tunnel will furnish drainage to the mine and an outlet for its ore.

THE YANKEE CON.

Herman W. Horne Brings News From That Tintic Mine.

Herman W. Horne, the well know. mining engineer, is back from Tintic, where he has been on professional bus. While in camp he made the rounds of several properties, including the Yankee Consolidated, from which property he brings encouragement

He says the drift from the tunnel, started near the May Day side lines. has been run for a distance of seventy. containing values up to sixty ounces in silver have been encountered. Coniltions look hopeful there to say the

The Joe Bowers Extension, Mr. Horne states, never looked so well as it does now. It is true the mine has no ore in shipping quantities, but up to very recently it didn't have anything. pay streak measuring about two wide has been encountered next to the hanging wall on the 200-foot

Mr. Horne visited the May Day, jus before the connection was made with the ore reserves on the 100-foot level He saw the winze sunk from the fiftyfoot level, which is about fifteen feet deep and two sets wide, all in ore.

Mr. Horne thinks the May Day will develop into a big bonanza. The Pacific Mining company has surveyed three claims for patent.

DALY-WEST SOARS.

Sold as High as \$18.25 on the Curb Yesterday.

Daly-West made a rise of \$1 a share on the curb yesterday. The closing bid on the stock exchange was \$17.20 and sales were reported before the clo business hours at \$18.20 and \$18.25 a share. The stock was in strong demand and there is every indication that the prediction made by well in-formed mining men that the stock would go to \$20 by April 1 will come

pany's plaint at St. George.

Although it has beer kept a secret, the fact has leaked out that since Jan.

I this year, the mine has paid two dividends to the present stockholders, which seems a rather unusual proceeding in view of the fact that those who compares the company lays not read. comprise the company have not paid up the bond from the original owners of the mine. An officer explained this by saying yesterday that the bond has a long time to run and they expect to be able to meet every payment as it becomes due.

STRIKE IN THE CONGOR.

Most Important Disclosure in History of the Mine.

The news came over the telephon wires from Bingham late yesterday afternoon to Manager McConnaughy, of the Congor mine, announcing that the most important strike in the history of that property had been made during the day.

The new disclosure was made in an upraise of about ten feet from the third level, or about 250 feet from the

The message announcing the strike came from the superintendent of the mine and he declares that it is the richest thing in the way of copper ore ever produced from the Congor. No assays have been made as yet, but some idea of what the ore is, if the superintendent's reason is correct, may be tendent's reason is correct, may be judged from the fact that values of 53

per cent in the ract that values of 53 per cent in the red metal have been obtained her profore.

The new vein is said to be from eighteen inches to two feet in width. If it holds out, and Mr. McConnaughy thinks there is no doubt that it will, the Consor will be in shape to proper with thinks there is no doubt that it win, the Congor will be in shape to report with its initial shipment of high-grade ore before very long. Already some large bodies of milling stuff have been blocked cut.

CARBONATE HILL MILL.

Director Patrick Mullins Here For a Conference.

Patrick Mullins, one of the directors of the Carbonate Hill mine of Morgan county, came down from Butte yesterday morning and will remain in the city until Monday, when he will join his associates in making an examination of the property. During Mr. Mullins' stay definite plans will be outlined for the erection of a concentrating plant.
Mr. Mullins is quite elated over the

strike made on the lower levels of the mine a few days ago, which assures permanent shipments of high grade ore. The lower grade product will be held back until the new mill is completed, when it will be treated on the

COCONINO MINES.

Aquilla Nebeker Says the Smelte Equipment is En Route.

Aquilla Nebeker made his appearance in town yesterday, after an absence of several weeks. He is here to await information from Henry M. Ryan, one

he has further reports from Mr. Ryan under whose direction the equipmen has been purchased. Development work is going along

and since last fall a large force of men has been kept constantly employed in getting the mine in better shape for the reduction works.

Four Aces Encounters Good Oreshape for the reduction works.

Great bodies of copper ore of a very satisfactory grade have been blocked out, and by the time the new plant is ready the property will be in condition for a large production. Mr. Nebeker expects to visit the mines before he returns to his ranch in Rich county.

HOLDEN MAY RETIRE.

Centennial-Eureka Meeting to Held Next Tuesday.

occur in Boston on Tuesday next, and letters just received in this city from shareholders in that company express the opinion that A. F. Holden, presi-dent and director, will fail of re-election. Just what the causes are is not made plain, but dissatisfaction has been expressed from several sources

during the past few weeks.

On the same day, either before or after the election of a new beard, it is also expected that the first quarterly dividend in the sum of \$100,000 will be ordered paid.

ORE IN THE MASCOTTE.

Assays From The Shaft at the 1000-Level.

Superintendent Fred Mitchell of the ing still continues. Drifting on the 800 and 950 levels is being prosecuted at the same time, and the mine is looking fine. The rock in the bottom of the shaft, which has been in ore from the grass roots, is very high grade, carrying about 164 ounces silver, 12 per cent copper and from \$4 to \$5 in gold per ton. The volume of water, Mr. Mitchell says, does not appear to increase as depth is attained, and as the pumping plant handles the present flow greatest ease, he anticipates no trouble from that source for a long time to

CYANIDE RECEIPTS.

Only Two Contributors During the Week Just Closed.

The week's record among the cyaniding plants has not been of the liveliest, it being a "between season" period. On Monday the Mercur company reported at the gold sampling rooms with 950 pounds and yesterday the Sacramento company came forward with a 100-pound consignment—a rather slim showing for the latter company on a

mill run of over twenty days.

The business of the Chloride Point in the cyanide shipping line is no longer represented in the published reports, owing to the orders of Manager Duncan that the figures shall not be given out.

MINES AROUND DIAMOND.

Shipments From Shoebridge and Showers.

Plans Made For a Vigorous Campaign of ore under the present ownership.

It was made up of a very excellent grade of copper, sliver and lead metals, and is expected to net the company

the equipment on its journey to the south last evening.

While the Webb bond was pending on the property the extraction of ore was not carried on very vigorously; all efforts being turned towards development.

Now that the bond has expired and the mine is again in the hands of those who executed it, it is the intention to inaugurate a new campaign of product tion and at the same time keep the exploration work going on as vigorously. The substantial demonstration made to greatly reduce the cost of extraction, it was deemed advisable to put in the new holst. Some very high-grade ore has been blocked out on the lower levels. This will be shipped to the Salt Lake smelters, while the lower grade product will be treated at the company's plant at St. George.

Although it has been kept a secret.

Although it has been kept a secret, which is the adjoining southern extension.

The values to be obtained through the process of concentration. They have practically an inexhaustfile amount of milling dwt, and if it is found that it can be handled to an advantage, a suitable jigging plant will be elieved to not he company's grounds. The substantial demonstration made by the Shoebridge-Bonanza people seems to have inspired the Homestake company with renewed hope, and it is believed that some action is on foot now to inaugurate a move with a view of determining the values to be obtained through the process of concentration. They have practically an inexhaustfile amount of milling dwt, and if it is found that it can be handled to an advantage, a suitable jigging plant will be placed on the company's grounds.

PARK VALLEY COMPANY. To Develop Claims Near the Century and El Amigo.

With a group of claims lying be tween the El Amigo and Century-Golconda properties in the Park Valley district as a basis, a strong company of well known mining operators was formed in this city yesterday, and on Monday the articles of incorporation will be filed. The combination will do business under the name of the Buffalo Mining company, with a capital stock of \$30,000, divided into 300,000 10-cent shares. A good round sum has been turned into the treasury with which to begin operations, and 100,000 shares of the capital stock is set aside to pro the capital stock is set aside to provide additional money to carry on the work. The incorporators are John L. Weber, E. H. Airis, W. V. Rice, W. H. Clark, John C. Lynch, S. W. Mosby, C. E. Street, W. D. Bogan and one or two others whose names were not given. John L. Weber is president; W. H. Clark, vice president; C. E. Street, secretary, and John C. Lynch, treasurer, the other director being S. W. Mosby. the other director being S. W. Mosby. It is the purpose of the incorporators to begin operations at once, and during the coming week officers of the company, accompanied by a surveyor will go out, have the claims, four or five in number, all surveyed, and determine at what point to begin work.

The Buffalo claim has a five-foot vein, which has only been opened by a

ten-foot cut, but ore running 126½ ounces silver, 46½ per cent lead and \$1.60 in gold has been uncovered. A second character of ore from the vein runs well in gold exclusively. In the group of claims three other veins have had more or less work done upon th the Excelsior vein carrying rock which averages \$6 in gold after throwing out all quartz, showing the metal in ite free state. The company was formed by Mr. Street, and with the strong art ray of talent the worth of the ground will not be long in being determined.

SILVER CITY NOTES.

(Special Correspondence.) Silver City, March 24 .- It certainly begins to look as if the Four Aces may at any time encounter an ore chute of permanence and volume which will enable them to extract ore from a terri-tory not in controversy or dispute. Last week Superintendent Thomas G. Coale sent out two carloads of very good ore, and he has two more cars of the same material ready for shipment. The annual meeting of the Centenmial-Eureka company is scheduled to shaftway. Mr. Coale maintains that recent prospecting has disclosed gratt-fying conditions in the Four Aces. Manager McGhan of the Rabbit's Foot has had a serious fight with the water for the past two weeks, but has finally gotten the flow under control, and sinking will continue. Though circumstances have made it impossible to

lift any ore lately, men have been engaged in cutting mineral in the raise and winze on the 350 level. Many recent changes in the Picnic

300 and the crosscut southerly on the same level reveal ore-making ground. thus: Frank Schuyler has been testing the lay in ledge matter closely of late with most

raging results.

DALY - WEST FEATURE

THIS STOCK RECORDED STEADY ADVANCE.

Important Developments Made In May Day Mine Causes a Rise In That Stock-Northern Light Flurry-Sales of the Week-General Summary-Closing Quotations.

The record made during the past week y the Salt Lake Stock & Mining exchange shows only a fair volume of business, yet conditions were encouragng and taking into consideration the neral luli in all classes of stocks the week's business was quite satisfactory. Many brokers believe they see signs of a decided improvement in the stock

The most of the trading was confined

The most of the trading was confined to investment securities last week, however, there was quite a call for those classed as the speculative kind. Ajax made no change of any note over the previous week. There was quite a demand for it but the stock is held pretty close and very little was brought out on the open board. Bullion-Beck was sluggish and prices ruled low, but the close of the week brought a little more activity than the beginning. Centennial-Eureka was quoted at improved prices but no stock was sold locally. Those who have the stock are hanging onto it in hopes of capturing the dividend promised for this week. At the same time the mine continues to develop larger or reserves and the output is larger. At the same time the mine continues to develop larger ore reserves and the output is larger. A train load of ore consisting of twenty-nine cars landed at the samplers on Friday in one lot. Chloride Point was inactive and dull with no stock in demand. Congor, a most promising Bingham proposition, brought out a few inquiries. Daly was in fair demand but prices were not so strong. Daly-West has been the real feature since a week ago and has registered a steady advance closing yesterday with \$17.20 bid, a rise of nearly \$1 a share since Saturday a week ago. On Friday the stock was curbed pretty freely between \$17.50 and \$17.75, the highest point yet recorded. Daisy has found some buyers during the week.

An affort has been made to relieve the An effort has been made to relieve the company's distress by a minority of the stockholders. Two meetings were held for that purpose, but both adjourned without accomplishing anything, so it seems that the mine is doomed to its fate, the foredosure of the trust deed of \$25,000. The company's total indebtedness is something over \$32,000. Eagle & Blue Bell is low and not wanted by anyone even at present prices. Goyser-An effort has been made to relieve the edness is something over \$32,000. Eagle & Blue Bell is low and not wanted by anyone even at present prices. Geyser-Marien has been sluggish the past week. Grand Central has been active and sold up to \$6, but closed weaker. The connection has been made with the ore bodies on the 900 level and heavy shipments are looked for again. Golden Bagle has been active, but at reduced prices. The new board of directors is making an effort to strengthen the affairs of the the mine out and steps towards the erection of a new mill are being discussed. Lower Mammoth has been a strong feature during the week. The stock fluctuated some but ended up above 50 cents a share. Mammoth held up fairly well considering everything. The board of directors met and passed this month's dividend, but it is quite likely the Tintic bonanza will report with one in April without fail. The May Day mine is coming to the front again. Two important strikes have been made since a week ago, one in the big stope carrying values from

Who Made the Worst Kind of a Monkey of Him.

(Washington Star.) "The meanest man I ever see," said the gentlemanly ex-hotel sneak, "was

It looked from his style that phony, but I didn't intend to be baited into any trap with my lamps open.

"He stood griming at me.

"Guess you were after the singstreer's stuff, hey, Bud,' says he to me, 'and in the dark you got mixed on the rooms? Well, she's out, all right, and so's her maid. I'd ha' gone after her gear myself, but that kind o' work's a bit out o' my line, and I'm clumsy at it. Sit down. She's singing at a matine, mee, and you've got lots of time. Much in the down's mee, and you've got lots of time. Much in the down's mee, and you've got lots of time. Much in the down's mee, and you've got lots of time. Much in the joint provides the same in the same i

to shoot out to the right length for such a good looker. But I didn't pro-pose to nibble until I had the game

and a couple o' glasses, handed me the layout on a tray with the water bottle, and stood chuckling while I poured out a hooter and threw it in. Then he took a small drink himself and went on

"Ever do anything in the crib-crack-ng line?" he asked me, twisting his

mustache and looking as calm as a mill d.
'No,' said I, 'that's off my beat. It's plain to me that he was a phony .02 .05 was plain to me that he was a phony and I chucked up the bluff I'd been making. I'm a padded-shoe and a

lay-worker entirely. Can't stand for esing my beauty sleep." "Don't know but what you're right, bal, said he, crossing the room bal, pal, said he, crossing the room and picking up a suit case that lay on his bed. My end of it's pretty wearing, for a fact. They've just turned me loom

ofter a two-years' stretch down Quentin, and I've got my eye on three neat things in this town pulling my freight for the east. pulling my freight for the east."

"He opened the suit case and showed me as pretty a set o' new tools as ever I see—whole outfit, from all sizes of alligator files and Jameses to clothwrapped bottles o' nitro-glyss. That convinced me. I could see that he was O. K.

convinced me. I could see that he was O. K.

""See here, podner," said I, after we talked for a while longer, I'm sorry to break away, but there hasn't been much doing with me lately, and I need the old girl's stuff next door. Want to see if she's left her gig-lamps behind, and even if she hasn't there'll be enough in the clean-up to pay for the hunt. Glad to have run against you. See you some other time. Hope you win out on your jobs. Now, I'll just step in next door, and, by the way, if you hear anybody coming just give me the knock on the wall, will you?"

""Sure," said he, and I edged out and reached for the knob of the prima donna's door. Of course, it was a side of the course, it was a sure of the said of the prima donna's door. Of course, it was a side of the was a side of the course, it was a side of the w

reached for the knob of the prima don-na's door. Of course, it was locked, but I had the right skeleton for it in my I had the right skeleton for it in my mitt, and I was inside in ten seconds. "Weil say, the carelessness of theo stage folks is queer, isn't it? That singing woman's stuff—I suppose she was wearing the paste at the matines was wearing the paste at the matines are the matines wearing the paste at the matines. was wearing the paste at the matinee performance—was spread out all over her chiffonier—not even salted away in the jewel cases that littered the bureau. It was something easy. I dropped

I turned the knob of the door and stepped out. The next-door phony was waiting for me. So were two cops. So were the proprietor and the manager of the hotel, The chap that I'd run into next door had the wristlets on me before I had time to blush. My pais did some buying when I came to be tried, and I only got a two-years' stretch.

got a two-years' stretch.

"The big guy into whose room I had slipped by accident was a Denver de-tective. He'd brought a requisitioned burglar from Denver to San Francisco. and when I ran into him he was just about to take his man's set o' tools to the property clerk. He sure made a chimpanzee o' me."

THE NEW NILE.

Greatest Engineering Feat the World Has Ever Seen. (John Ward, F. S. A., in Ainslee's

Magazine.) "When the Nile reservoirs planned by the great Willcocks were first made known to the world, and it was found that he, although offering six or seven a chap I falls in on in a room in the sites for his cyclopean designs, really Palace Hotel, San Francisco. I stud- only highly recommended one, the conied the make-up of the halimen's pla- struction of which would wipe out the toon in that outfit for a week or ten island of Philae, the loveliest spot on days, watching for absentees, before the Nile, there was an universal howl I got a chance to do anything. Then the third floor front hallman turned up one afternoon missing. S'pose he was sick, or on a drunk, or something like that. I figured that they couldn't get another hallman to take his place before the next morning, and so I concluded to do a little business along the line of the third floor front right away. I happened to know that there were some good people located in that end of the house, and I took a rubberneck at the key rack and saw that a lot of them were out, their keys being pig-

face, though.

"I'll have to ask you to excuse me," I began, standing up straight and throwing out a Sandow vest for a bluff.

"The twists and turns of this."

"The chap lowers his razor and turns around and hand me the winning archaeologist, we will gain millions of around and hand me the winning archaeologist, we will gain millions of acres more for the fellaheen's agricul-"'Cut that, pal,' said he, wise like ture, and the revenue from the irriga-tion it will afford will double the return of annual income to the finance government—so much so that if the British were allowed a free hand, this

PROBATE AND GUARD-IANSHIP NOTICES

Consult County Clerk or the Respective Signers for Further Information such a good looker. But I didn't propose to nibble until I had the game copped dead to rights.

"Look here, my friend,' said I, doing a heavy I don't-get-next stunt, what the deuce are you talking about?"

"Well, sir, he just threw his head back and hollored.

"You've get your business down all pat, pal,' said he when he was able to talk for his chuckling. 'However, don't make me giggie. I've got the earache. Just switch that parson end of it, and deal from the middle or bottom. You're working the halls. Well, that's not my lay, but every man to his own graft. Have a ball?

"He went over to his dresser, picked up a quart bottle of the correct goods and a couple of classes, handed me the

Assessment Notice No. 12. THE TETRO MINING COMPANY OF heavy lime o' thinks. This gezabo might be passing me the counterfait spiel, I thought, and I wasn't looking for any corral.

"He finished his shaving, washed his face, rubbed some scenty stuff on it, powered it with a block o' chelk, handed me the bottle and glass again, took one along with me, and sat down on a rocking chair.

of Utah.

Any stock upon which this assessment shall remain unpsid on Saturday, April 28th, 1909, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on Saturday, the 19th day of May, 1900, to pay the delinquent assessment, to gether with the costs of advertising and expense of sale.

By order of the board of directors.

ERNEST WILLIAMS, Secretary, Salt Lake City, Utah, March 24th, 1992.
